& Doors Technology

seccurit

YOUR DREAMS ARE SAFE NOW!

Why SECCURIT

We at SECCURIT use highest quality materials which makes perfect choice for Indian Climate. All material goes through a thorough testing process to make sure the quality is best achieved.

Each product is carefully customized as per our clients wish in terms of size, colour & design to match their requirement. Accessories & components are used from the best of suppliers. All our products come with 15 years warranty.

What is uPVC

Poly vinyl chloride as it is most commonly known as PVC is one of the best materials used in day to day living. PVC is soft and flexible because of an additives plasticizer used during the process.

Non using of this plasticizer is called as uPVC (unplastiezed Poly Vinyl Chloride) or rigid Pvc which is stronger, rigid and hence can be used to make Doors & Windows.
